The transformation matrix from the physical coordinate (x, p_x, y, p_y) to the x-y decoupled coordinate (X, P_X, Y, P_Y) is written as $R = \begin{pmatrix} \mu I & Jr^T J \\ r & \mu I \end{pmatrix} = \begin{pmatrix} \mu & . & -\kappa 4 & \kappa 2 \\ . & \mu & \kappa 3 & -\kappa 1 \\ \kappa 1 & \kappa 2 & \mu & . \\ R_1 & \kappa_2 & \mu & . \end{pmatrix}$ (60)

 $r = \begin{pmatrix} R1 & R2 \\ R3 & R4 \end{pmatrix},$

(61)

(62)

(63)

(64)

(66)

$$\mu^{2} + \det(\mathbf{r}) = 1,$$

$$\mathbf{I} = \begin{pmatrix} 1 & 0 \\ 0 & 1 \end{pmatrix},$$

 $\mathbf{J} \equiv \begin{pmatrix} 0 & 1 \\ -1 & 0 \end{pmatrix}.$

with a submatrix

used when det(r) >= 0.625.

where

The inverse of R is obtained by reversing the sign of r:
$$\left(\begin{array}{cccc} \mu & . & R4 & -R2 \end{array} \right)$$

 $\mathbf{R}^{-1} = \begin{pmatrix} \mu \mathbf{I} & -\mathbf{J} \mathbf{r}^T \mathbf{J} \\ -\mathbf{r} & \mu \mathbf{I} \end{pmatrix} = \begin{pmatrix} \mu & \cdot & \mathbf{K4} & -\mathbf{K2} \\ \cdot & \mu & -\mathbf{R3} & \mathbf{R1} \\ -\mathbf{R1} & -\mathbf{R2} & \mu & \cdot \\ \mathbf{R3} & \mathbf{R4} & \mathbf{R4} \end{pmatrix}$ (65)The value of the function DETR is equal to det(r) in this case.

Let T stand for the physical transfer matrix from location 1 to location 2, then the transformation in the decoupled coordinate is diagonalized as

oordinate is diagonalized as
$$\mathbf{p}_{\mathbf{T}}\mathbf{T}^{-1} = \begin{pmatrix} \mathbf{T}_X & 0 \end{pmatrix}$$

 $R_2TR_1^{-1} = \begin{pmatrix} T_X & 0 \\ 0 & T_V \end{pmatrix}$.

The Twiss parameters are defined for the 2 by 2 matrices T_X and T_Y . If $det(r) \ge 1$, the above condition for μ is violated. In such a case, an alternative form of R is used:

If
$$det(r) \ge 1$$
, the above condition for μ is violated. In such a case, an alternative form of R is used:
$$R = \begin{pmatrix} Jr^T J & \mu I \\ \mu I & r \end{pmatrix},$$
(67)

where $\mu^2 + \det(\mathbf{r}) = 1$. The function DETR shows a number $a - \det(\mathbf{r})$, where a = 1.375. thus the alternative form is
